

I am writing to show support for Airl, a national & regional broadcaster in my community. I am able to listen to their radio programming where few other radio stations come in. I really enjoy the music that they play and am unable to find that on other local radio stations in my community. Airl plays music that is positive & encouraging. If Airl were displaced by LPFM broadcaster, I am afraid that I would not have a good alternative to turn to and would be afraid that the local programming would not be appropriate for my family. Please don't allow the current FM stations to be over ruled by other programming.
